

Security / Report Vulnerabilities

Found a security vulnerability?
We welcome responsible reports of security vulnerabilities in our products.
Please report security vulnerabilities confidentially to:

security@ioss.de

Affected product and version:

Description of the security vulnerability:

Potential impact

Steps to reproduce

Your contact details for follow-up questions

Name:	
Phone:	
E-Mail:	

How We Handle Reports

We review incoming reports confidentially and assess their impact. If necessary, we coordinate remediation with affected customers or third-party component manufacturers.
We ask that information about a security vulnerability not be disclosed publicly before we have had sufficient opportunity to investigate and remediate the issue.

Note: IOSS does not currently operate a bug bounty program.

Security Contact: security@ioss.de

Privacy Notice:

The information you provide will be processed exclusively for handling your security report and communicating with you regarding the report. Further information on the processing of personal data can be found in our Privacy Policy on our website.
